ABOUT ME

I'm an undergraduate Computer Science student at BINUS University with strong interests in data analytics and problem-solving. I'm proficient in developing data-driven, code-based, and design-informed solutions using Python, C, and SQL, and I'm seeking hands-on experience to keep growing across engineering, machine learning, and design.

EDUCATION

Bina Nusantara University

Bachelor of Computer Science

Sep 2024 – Present | GPA: 3.59

PROJECTS

Software Engineering Project

POS System

A web-based Point of Sale system built for a cloud-based automotive workshop, designed to digitize and streamline day to day transactions and operations for the masses (SDG 8-aligned).

Machine Learning Project

Tri-Model Phishing Detection (Paper Accepted & Presented at ICISS 2026 – Proceedings Pending)

Multimodal Phishing Detection : Integrates message context, URL structure, and HTML content into a single detection system, catching phishing attempts that single-signal methods miss.

Short-Term Stock Price Prediction

A comparative study of two deep learning architectures, LSTM and GRU, to see which better predicts short-term stock price movement from historical time series data.

UI/UX Project

Solutio

A concept app that uses AI to give people personalized suggestions on how to save and invest money more effectively, prototyped as a Figma UI/UX design.

PetPals

A centralized app concept for pet care : helping owners find trusted vets and adoption services, access reliable pet health guidance, and connect with a community of fellow pet owners.

Data Analysis Project

Chronic Diseases Patient's Dropout Rate Analysis

Analyzing significant contributors for chronic patient's dropout rate in real healthcare datasets, using data visualizations to derive insights for data-driven interpretation and decision support.

SKILL

- **Programming & Core Logic:** Python, C
- **Data & Machine Learning:** Machine Learning, SQL, Data Visualization
- **Developer Tools & Design:** Figma, Jupyter Notebook
- **Management Skills:** Scrum, Sprint Planning, UML Diagramming
- **Soft Skills:** Communication, Problem-solving, Teamwork, Collaboration, Adaptability, Willingness to Learn
